

Installation Note ~ LiyiTouch v3.x for Windows 98 / 98SE

Due to our driver must call HID mouse driver on Windows 98/98SE platform. But it was not included when you install Windows 98/98SE. By the way, When you install LiyiTouch Driver on windows 98/98SE, you must note something as follow:

1. Prepare Windows 98/98SE CDROM.
2. When you install LiyiTouch Driver, **DO NOT connects the USB** cable which connects Touch Controller and your PC. After finish installation, connecting this USB cable. (** If you have to install driver and connect USB cable, You can do it. BUT after finish installation, You must **RESTART YOUR COMPUTER.***)
3. After connect USB cable (or you restart your computer), system will call attention to **insert Win98 CDROM**. Follow through message to finish HID driver installation. Now you can use touch panel.
